

Pilot Program-to-Program Articulation Project

Mathematics – Interim Progress Report August 2010

During the month of July there was minimal discussion among the members of the Math PAC. We attribute this to the summer/vacation season. The first set of non-calculus competencies was posted (July 8th) for review and discussion. The competencies included relate to topics typically found in a "Foundations of Higher Mathematics" or an "Introduction to Math Proof" type course.
